## Tire Gauges

### Benefits

The MASS Systems range of aircraft Tire Gauges introduce many design enhancements over competing units. While the Tire Gauges look similar, many internal improvements have been implemented:

- Valve stem strength has been increased to prevent over torquing damage.
- Accuracy has been improved +0/-5 psig at the operating pressure of 200 psig.
- Improved crystal seal eliminates fogging.
- Crystal seal will withstand full tire pressure load in case of failure of the Bourdon Tube.
